GAS DEPARTMENT**

Customer Notification  
Excess Flow Valves

The City of Marshall, Illinois in accordance with the Minimum Federal Pipeline Safety Standards 49 CFR 192.383 hereby provides notification that an excess flow valve meeting the performance standards of 192.381 is available for installation in your gas service line. The cost of such installation is the responsibility of the customer.

Excess Flow valves are designed to shut off the flow of natural gas should your service line be severed.

The interruption of gas service may be caused by natural disaster, ground movement or third party damage.

The cost to install such a device is \$50.00 for 3/4" plastic service lines and \$55.00 for 3/4" steel service lines. Other sizes will be provided on an as requested basis.

The customer will bear all costs associated with the maintenance and replacement of such device should you request it to be installed. We estimate the replacement cost could be approximately \$600.00 should it be required.
